

## RADIANT SERVICE AREA

(shaded portion)

Radiant Electric strives to serve our members as effectively and efficiently as possible. Our Automated Metering Infrastructure (AMI) closely monitors the health of our system and indicates problems at the substation, along the line or with an individual service.

Our AMI system reads meters daily allowing us to address customer concerns over usage and alleviates the need for members or personnel to physically read the meter for billing each month.

If you have need assistance concerning your service or have questions regarding the cooperative, please let us know—we are here to serve you!

Take a moment to visit us online. From our site, you can access your account and learn more about Radiant's member services and programs.
